The goal of this plan is to enable BCDB students, who are considering co-mentors, to discuss how scientific contributions and commitments are for each co-mentor. Financial contributions are additionally important so please include the funding that will pay the student's stipend and consumables in each lab.

### **Scientific Plan**

Please explain how each co-mentor contributes intellectually to the dissertation research and include how often you meet with each mentor individually and time spent in each of the two labs (if possible).

### **Financial Plan**

Please explain how each co-mentor contributes financially in terms of the student stipend and funds to perform dissertation research (consumables).

Please submit this form electronically, along with your **Rotation Advisor Selection Agreement**, to the BCDB Program Administrator and the DGS via email.
