Name of DGS-selected committee member — Signature

4) _____ _____
Name of DGS-selected committee member — Signature

PREVIEW

(continued on next page)

Note to faculty: You may be approached in the coming weeks with requests to join a student's exam committee this year. Please consider this possibility in responding to invitations, if, for example, you wish to limit the total number of exams you sit on, or wish to choose amongst multiple possible committees.

Note to student:

Project Description- To help faculty gauge their appropriateness for your committee, please provide a copy of your F31/grants class Abstract and Specific Aims pages to those you ask to join your exam committee. This helps insure they are familiar with the area the exam will cover as they decide on committee membership.

Opportunity to Challenge- The student may opt to ask the DGS to change one of the DGS-selected members by providing a written request that stipulates the scientific basis for a challenge. If the DGS and Chair of the Qualifying Exam agree to make a change they will select an alternative member.
